Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- Hot and dry conditions have primed fuels for enhanced fire danger can be expected this weekend through much of Northern California and the Eastern Sierras.
- Thunderstorms with little rainfall and gusty winds could cause fire starts and quick spread.
- Increasing moisture with storms could cause debris flows near burn scars as the weekend progresses.

Active Weather Warnings, Watches and Advisories by County: http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION:

WEATHER

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

An approaching upper level low off the California coast will bring the potential for isolated to scattered thunderstorms from late this afternoon through the end of the weekend primarily across the interior. Temperatures over the interior will be closer to normal through Sunday with hotter temperatures returning next week.

Medford Weather:

Thunderstorms yesterday were smaller compared to Friday. This was mainly due to the lack of a upward atmospheric movement moving through to initiate storms. Today will not be so quiet and temperatures will be cooler as a result of the increased cloud cover.

Reno Weather:

High pressure over the Great Basin and low pressure off the California coast will continue to funnel moisture resulting in chances for thunderstorms through the upcoming week. Some storms may produce dry lightning and strong outflow winds tomorrow. Warm temperatures will continue through next week, with good potential for another heat wave starting Wednesday.

San Francisco Weather:

Isolated light showers may continue until mid-morning today mainly across portions of the North and East Bay. Otherwise drier conditions will develop today with little change in temperatures from yesterday. A warming trend is forecast from Monday through Wednesday, especially inland, as high pressure builds over California. The heat could become rather oppressive inland by Tuesday. Slight cooling is then expected late in the week.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Not as hot today, then heat returns next week. Some afternoon Sierra thunderstorms can be expected throughout the week, mostly south of Interstate 80.

Hanford Weather:

A surge of monsoonal moisture will provide an increased threat of showers and isolated thunderstorms mainly across the mountains and desert through Thursday. Otherwise partly cloudy skies and above average temperatures continue to persist.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Upper-level high pressure will remain in place over the Great Basin for much of the week bringing varying amounts of monsoonal moisture. This will carry a slight chance of thunderstorms to the mountains and deserts for most if not all of the week. Temperatures are expected to be above normal, especially away from the coast with some cooling expected by the end of the week into the holiday weekend.

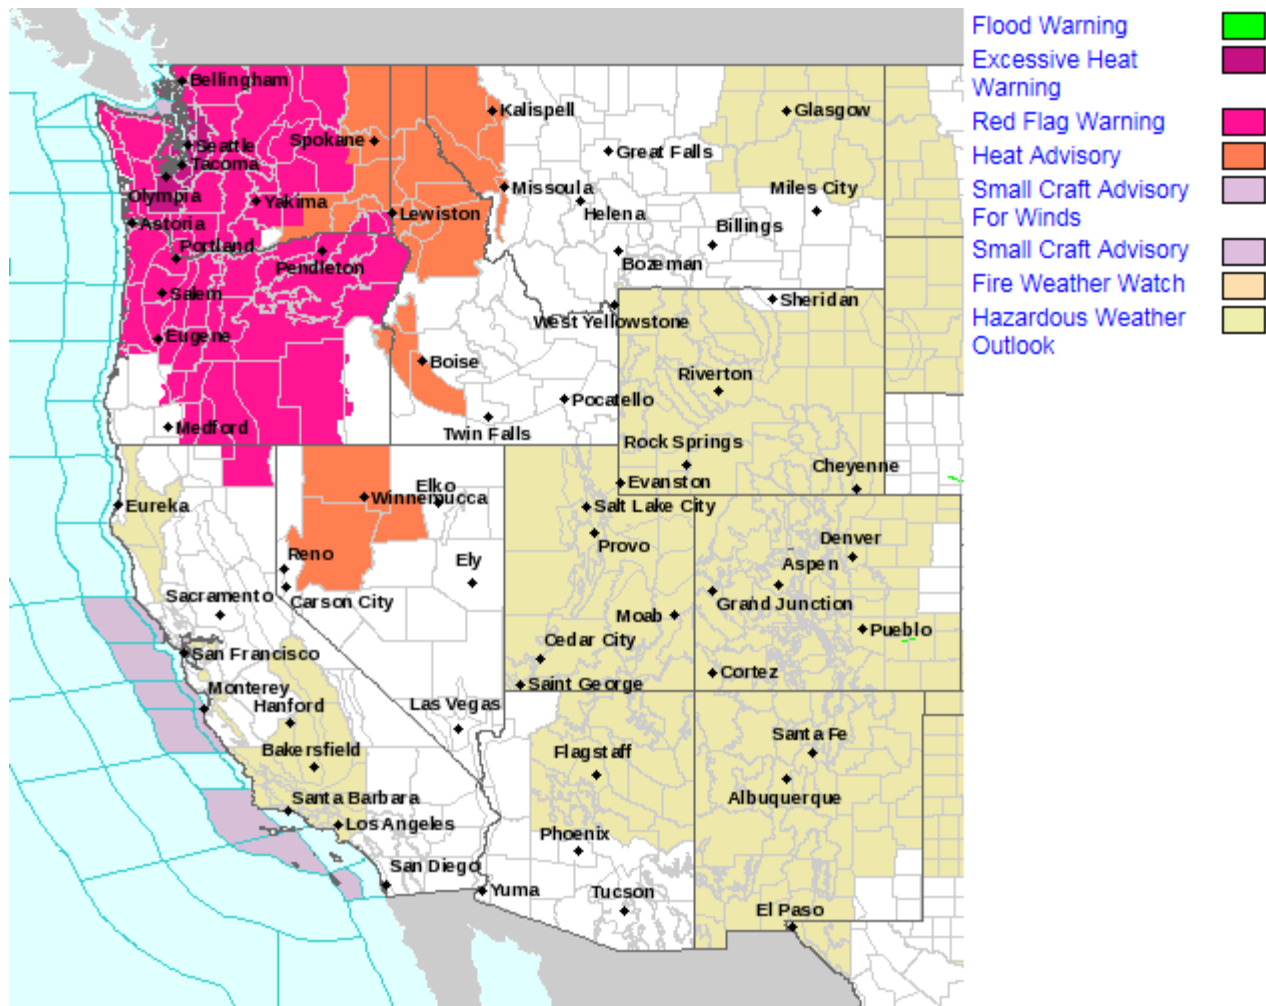

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

An abundant flow of mid and high level monsoonal moisture will continue into Monday with a slight chance of afternoon thunderstorms near the mountains today and a little greater chance for afternoon thunderstorms near the mountains Monday and Tuesday. A slight of afternoon thunderstorms, mainly for the mountains, will continue for much of the rest of the week. A shallow marine layer and weak onshore flow will keep coastal areas cooler with a greater return of night and morning coastal low clouds and fog later in the week.

Southeast California Weather:

Several evenings will carry a slight chance for thunderstorms to move into the populated lower desert areas. The most likely outcome in those areas will be gusty winds and some blowing dust, but very localized brief heavy rain will also be possible. Afternoon temperatures will remain slightly above normal though below the excessive levels experienced the past couple weeks.
